

Conflict Minerals Policy Statement:

As a socially responsible company Royal Die and Stamping is committed to helping end violence, human suffering and ecological devastation in regions of conflict such as the Democratic Republic of the Congo (DRC) and adjoining countries by sourcing components and materials from companies that share our values around human rights, ethics and environmental responsibility.

The U.S. Securities and Exchange Commission's conflict minerals rule under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act requires public companies to report annually the presence of conflict minerals (Tin, Tungsten, Tantalum and Gold, or "3TG") originating in the DRC or adjoining "covered" countries. Royal Die and Stamping Company will strive to comply with any and all obligations applicable to our Company under this legislation by continued monitoring of our purchased components and material supply. To reasonably assure components and materials supplied by Royal Die and Stamping do not contain "conflict minerals", we, along with our direct and indirect supply chain, will monitor and report compliance information as required. If risks are identified Royal Die and Stamping may continue trade with the affected company while risk mitigation efforts are made, or disengage from said supplier company after failed attempts at mitigation where Royal Die and Stamping deems mitigation not feasible or the risks are unacceptable.

Our partnership with component and material suppliers is based on a mutual agreement and commitment to be socially responsible entities complying with legal and environmental rules and obligations. It is Royal Die and Stamping's expectation that all suppliers, direct and indirect, comply with the conflict minerals rule under section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.
